All-

With Gary's retirement, we will be changing a few things about how we distribute census enrollment data for each term and for the year. There are two reports available at any time on <http://data247.dmac.edu> right now. Once you log in , there is a box titled, CENSUS ENROLLMENT SUMMARIES (shown below). There is a report for terms (fall, spring and summer) and one for annual data. Both of these are for credit only at this point, but we will be rolling out a non-credit summary as well before the end of the fiscal year.

The term report contains data for the more recent fall, spring and summer terms and four years of history for comparison. The annual report contains data for the most recent year and provides four terms of historical data. All of this data is also available as enrollment visualizations, but many requested a simple report as well. If data you want is not on the report, please use the enrollment visualizations for more information.

After each census period, I will send a report to all that receive the PIT reports as well. Please let me know if you have questions.
