

# EARN YOUR PROFESSIONAL OPERATOR (PO) CERTIFICATION AND BE HONORED AT THE ALL IOWA CONFERENCE

**July 7<sup>th</sup>, 2026 | DMACC, Building 5, Ankeny, IA**

The water and wastewater industry demands skilled, dedicated professionals, and the Professional Operator (PO) certification is your opportunity to have that dedication officially recognized. The All Iowa Drinking Water and Wastewater Treatment Conference will include a PO pinning ceremony to recognize and honor operators who have earned the designation. It is a celebration of your commitment to the profession, your community, and the people who depend on safe water every day.

## What is the PO Certification?

The PO is the water industry's premier professional designation by WPI, available across core four disciplines: water treatment, water distribution, wastewater treatment, and wastewater collection, and four class levels. It is nationally and internationally recognized, borderless in scope, and designed to follow you throughout your career no matter where it takes you.

## Why Become a PO?

Demonstrate your professional competence with a credential respected across national and international borders. Join a community of operators committed to advocacy, mentorship, and elevating the profession. *Many operators already holding state or local licenses may qualify for direct reciprocity, meaning the path to your PO may be shorter than you think.*

## About Us

Water Professionals International (WPI) has been the global authority for professional certification of water and wastewater operators.
