STUDY EXPECTATIONS/TIPS: For many of you, pharmacology will be the most difficult course you will take at DMACC. However, with hard work, perseverance, and a little help you will succeed in this course. Web courses are especially tricky for first time college students. While the flexibility of being able to take a course and do the work at any time is helpful, that is the biggest problem. I recommend you put scheduled hours to complete the online part of your work for this course each week. So just like a face-to-face class write in MWF 2:10 to 3:00 PM when you will sit at the computer and do your work. **Do your homework!** Learning is hard work. Try to have a study place that is quiet, uncluttered, and free of distractions. Most of us need to put forth a considerable effort to earn A's and B's in college-level courses. Only you can decide if it is worth the effort and time. To do well in

this class, you must do your homework regularly (see schedule and dateline on the last pages). Students are expected to devote at least two hours of study time for each contact hour. It is realistic to expect to spend at least 6 hours per week studying for this class. (Summer courses will take even more time because of the compressed schedule. Also, your background in science will have a huge impact on the amount of time you spend studying) Study the assigned readings, which will help you follow the content of the lecture. Review your lecture notes. ●Ask questions. **Stay up-to-date** This is a fast paced, hands-on course. The content of this course builds on itself throughout the semester. Consequently, it is important that students master early concepts, as they will become building blocks for concepts introduced later in the course. ●Take good notes. Many of the test questions resemble those worked out in class. Rewrite your lecture notes (if you have time.) Use the lecture text to supplement your notes. Highlight key words and phrases in color. ●If you miss any lecture, it is your responsibility to obtain the notes from a classmate as soon as possible. Then review the missed notes and ask the instructor any questions on the missed material as soon as possible. **Get Help!** Students should seek extra help (tutoring, come in to office hours, visit the achievement center) as soon as possible if they feel that they are getting behind on the course material.

The ADA Coordinator's office is located in Bldg. 6-10E on the Ankeny Campus and may be contacted by voice (515-964-6857). The ADA Coordinator is responsible for ensuring that the college complies with federal regulations that guarantee qualified students with disabilities equal access to all programs and services. Any student, faculty, or staff member may contact the ADA Coordinator's office for clarification of federal regulations, appeal of a grievance, or resolution of a disability-related problem.

ADDITIONAL INFORMATION

DMACC wants to support student success through our Early Alert System. Early Alert connects students to available resources such as advising, counseling, tutoring and more. Faculty members may refer students to these supports in cases in which a student is showing difficulty in attendance, course work, and/or reported situations in which more support could aide in college success. Students are encouraged to respond to all DMACC phone calls or emails and take full advantage of available resources to support a positive college experience. More information can be found at <https://earlyalert.dmacc.edu>.

To access additional information related to DMACC policies and procedures that impact the classroom (e.g. use of technology, weather-related cancellations, classroom conduct, etc.) please reference the DMACC student portal.

If you do not have access to a computer and need a printed version of any of the information described above, contact your instructor.
